  Project presentations, updates
  and impact report

- **Present the tree and its project
  directly in the confirmation mail**
  For individual customer
  communication

**Realized as
One Crew | One Tree
for the event staff industry** ↗

Giving back is in our view part of the entrepreneurial responsibility. One X | One Tree allows to connect the amount of an individual indicator to the donation of one tree. For example one tree for every sent invoice, every certain invoice item or chosen amount of revenue.

A tree counter embedded in your website shows your growing forest. And your clients get a short information where and in which project their tree(s) will be planted.

The planting projects are chosen by project Partner Panterito Foundation. All projects are designed in a way that there is an interest of the direct stakeholders in the growth of the seedlings. That´s why we often support agroforestry projects. Panterito provides communication material for the assigned projects and an annual impact reporting.

What the tool includes

- Setup in SquidWeb
- Tree counter on your website
- Monthly reporting of the counted trees
- Communication materials for website (project presentation) and social media (updates)
