Team
550,00 €*

Each additional
employee
65,00 €*

One-time costs
No ongoing fees

* All prices excl. tax

The Sustainable Seeds vCard Module makes your classic paper business cards digital and helps save your contact into your customer's address book by only one click. The business cards have an QR code leading to a mobile optimized personal webpage.

There your customer has different options of action: besides downloading your vCard also getting in contact directly or being offered more information about your person and the company.

All content on the landing page can be changed at any time. Automatic synchronization of the contact data with SquidWeb is optionally possible.

Your team package includes

vCard Module for 5 persons

- Setup vCard Module in WordPress
- Adaptation of the vCard pages to your CI
- Creation of pages for 5 team members
- Design pattern for paper business cards

We can also take over the design and printing of your paper business cards, if you wish.
